Operational Gameplan

GBP Recovery

for Haven Landscaping & Real Estate

Google Business Profile Reinstatement

4 Suspended Profiles | 7 Actionable Tasks | 3 Blocked

Prepared by ZNAS LLC for Haven Landscaping & Real Estate

ZNAS LLC | April 2026 | Confidential

.01 · Context: What Happened and Where We Stand

Haven Landscaping & Real Estate has 4 Google Business Profiles suspended, their primary client acquisition channel. We've spent weeks researching this problem thoroughly: cross-referencing real documented cases from local SEO forums and publications, incorporating direct feedback from a verified recovery case involving an identical situation that was successfully resolved, and validating everything against Google's official documentation.

This document is the operational gameplan: what we do, what's blocked, and what only Angel can do.

> **Key insight from a verified recovery case:** Appeals with photos and basic videos were rejected twice. What worked on the third attempt was a continuous video with the business owner showing official ID, business documents, and a full walkthrough of the property. This is 100% backed by multiple independent sources, it's the current Google standard for SABs.

Suspended Profiles

LOCATION	PROFILE ID	STATUS	PRIORITY
Victorville	1636566071317976217	Suspended	**HIGHEST**
Fontana / Pasadena	2417227675405603122	Suspended + Re-appealed 08/2025	**High**
Rancho Cucamonga	2478298535914445050	Suspended	**High**
Irvine	11119964975956503481	Suspended	**Medium**

> **Critical rule:** Do NOT submit any appeal until ALL access credentials and documents are ready. Appealing with incomplete information burns one of the 2 standard attempts available. Fontana already used one in August 2025, we need the Case ID from that appeal.

.02 · Owner Legend

KIKE	Technical tasks, drafting appeals, building evidence dossier, submission. Everything that doesn't require access to Angel's accounts.
NORMA	Documentation, account access, passwords. Norma handles all admin. WhatsApp channel.
ANGEL	One thing only: record the verification video. Nobody else can do this.
MAJO	Client coordination, narrative validation, general communication.

.03 · What We Can Do Now: No Need to Wait

These 7 tasks require no account access, passwords, or client information. We can complete them this week while waiting for Norma's credentials.

1 **Polish the 4 appeal narratives (one per profile)** KIKE

We already have 2 draft versions in Notion. Adapt each one to the specific profile: city name, Profile ID, estimated suspension date. Tone: factual, no emotion, no blaming Google.

2 **Prepare the evidence dossier structure (ZIP template)** KIKE

Create folders with exact names ready to drop files in when Norma delivers them. Structure: /victorville/, /fontana/, /rancho-cucamonga/, /irvine/, each with the same document slots.

3 **Write the video script for Angel** KIKE

One-page document with step-by-step instructions: what to show, in what order, how many seconds per shot. Angel shouldn't have to improvise, just follow the script.

4 **Verify the 4 Profile IDs in the GBP Appeals Tool (no login needed)** KIKE

Confirm the IDs documented in Notion are valid and that the Appeals Tool recognizes them. This can be checked without being logged into the accounts.

Continued from previous page

5 **Prepare the compliance checklist (pre-flight)** KIKE

Full list of violations we must fix BEFORE appealing: SAB configured correctly, address hidden, name identical to CSLB license, no keyword stuffing, no duplicate profiles.

6 **Draft the WhatsApp message for Norma** MAJO

Clear, concise message with exactly what we need: numbered list of 8 items. Friendly tone, Norma is not technical. Include a one-line reason for each item.

7 **Track down the Fontana Case ID from the August 2025 appeal** MAJO

Fontana was appealed in August 2025 with no result. That Case ID is critical for the re-appeal. Ask Angel or Norma if they still have the Google email from that appeal.

.04 · Blocked: We Need This From Norma (via WhatsApp)

As Majo pointed out: without the email AND password for each account we can't access the Business Manager or the Appeals Tool. All technical work depends on these credentials.

B1 **Email + password for each Google/Gmail account** Norma

Without this: we cannot access the Appeals Tool or Business Manager. Blocker #1.

B2 **Access to Google Business Manager (or screen share)** Norma or Angel

To see the exact suspension type (soft vs. hard), real status, and detect duplicate profiles.

B3 **Exact business name BEFORE the LLC registration** Norma

To match the profile's history on Google and confirm whether the name change was the trigger.

B4 **Approximate suspension date for each profile** Norma

To contextualize whether it coincided with Google's spam sweep (Aug-Oct 2025).

Blocked items, continued

B5 Screenshot or copy of Google emails about suspension/denials Norma

Especially for Fontana (appealed August 2025). Contains the Case ID needed for re-appeal. Without this, Fontana starts from scratch.

B6 LLC Articles of Organization / Business Registration Norma

Required document for the dossier. The name must match the GBP character-for-character.

B7 Utility bill (electricity, gas, or internet) Norma

With business name or address. If in a personal name, address must match the business registration.

B8 Exact phone numbers for each suspended profile Norma

We have 3 numbers from the website but don't know which one belongs to which profile.

.05 · What Only Angel Can Do

> **One task, but it's the most important one in the entire process.** Verified recovery cases confirm it: appeals with photos and documents were rejected. The video with the owner on camera is what worked. Nobody on the team can do this for Angel.

The Verification Video: Full Script

Before recording: The video must be continuous, no cuts, recorded on a cell phone. Minimum 60 seconds, maximum 2 minutes. Google frequently processes these videos with the sound off, visual markers are what matter. Good lighting. Steady camera. Do not edit.

0:00-0:15	**Outside: street and address** Start on the street. Clearly show: a street sign OR the house/building number on the facade. This confirms the GPS and the real location of the business.
0:15-0:30	**Work truck with Haven Landscaping & Real Estate branding** Walk up to the truck and clearly show the Haven Landscaping & Real Estate logo/name on the body. A plain white van with no branding does NOT work, it must have visible branding. Unlock the truck with the keys.
0:30-0:45	**Tools and equipment inside the truck** Show the interior: shovels, compactors, irrigation tools, materials, whatever Angel uses. The goal: prove he's a real contractor with real equipment, not a random person with a phone.
0:45-1:00	**Business documents** Briefly show on camera: CSLB license #1009397 (name must be legible), and/or LLC registration, and/or a recent Joist contract with Haven Landscaping & Real Estate visible. No need to show bank account numbers, SSN, or sensitive information.
1:00-1:15	**Back outside: closing shot** Close with a wide shot of the full truck with branding and the street in the background. This visually ties the vehicle to the geographic location.

Note on personal ID: In verified recovery cases, showing an official ID in the video worked, but Google's guidelines state NOT to include sensitive personal information. Our recommendation: do NOT show a personal ID in the first attempt. Instead, show BUSINESS documents (CSLB license, LLC registration) where Angel's name appears as owner. If rejected, showing the ID would be the escalation move for the second attempt.

Critical timing: Angel cannot be on an active job when we submit the appeals. After submitting each appeal, there is exactly 60 minutes to upload the evidence (including the video). We need to coordinate that he's available that day, preferably in the morning.

.06 · Execution Sequence: In Order

Once we have Norma's credentials, this is the exact sequence to follow:

PHASE 0 This week

Parallel preparation

- KIKE: draft narratives + ZIP template + video script for Angel
- MAJO: WhatsApp message to Norma with list of 8 items
- MAJO: ask Angel/Norma for the Case ID from Fontana's Aug 2025 appeal

PHASE 1 As soon as Norma replies

Access credentials and documents

- Receive: emails + passwords for the 4 Google accounts
- Receive: LLC registration + utility bill + suspension dates
- KIKE: log into Business Manager, run compliance audit on all 4 profiles
- KIKE: fix all violations found BEFORE submitting any appeal

PHASE 2 Days 4-6

Dossier + video

- KIKE: complete the evidence dossier with Norma's docs (one ZIP per profile)
- MAJO: coordinate with Angel to record the video following the script
- MAJO: verify the video meets all requirements before proceeding

PHASE 3 When phases 0-2 are done

Submit appeals: Victorville first

- KIKE: submit Victorville appeal (highest priority)
- KIKE: upload evidence + video within 60 minutes of submission
- Repeat the same day for the 3 remaining profiles
- Save the 4 Case IDs from the confirmation emails

PHASE 4 Weeks 2-6

Monitoring and escalation if needed

- Wait for response: 4-6 weeks (backlog from 2025 spam sweep)
- If denied: re-appeal with additional documentation (1 more attempt)
- If denied twice: post in GBP Community Forum, contact Product Expert
- Product Expert: direct access to Google's team, 72 hrs to 1 week
